- Proficient in handling forms using the Formik library.
- Adept in Routing using React Router.
- Adequate Knowledge in state management in ReactJS applications using Redux and Redux Toolkit.
- A good knowledge in OOPs concept and core java

EDUCATION

	DURATION OF STUDY
Masters of Computer Applications-VSM college(A),Ramachandrapuram	2022 - 2024
CGPA:8.8	
Bachelors of Science- VSM College(A), Ramachandrapuram	2019 - 2022
CGPA:8.7	
Intermediate-MPC, Sree Siddartha Junior College, Angara	2017 - 2019
CGPA:9.6	
X Standard-SSC, Zpp High school, Angara	2016 - 2017
CGPA:9.0	

SKILLS

Programming Skills	Core Java
Scripting Languages	Java Script,NodeJs
UI Languages	HTML, CSS, Bootstrap
Libraries	ReactJS, Formik, React-Router -DOM, Redux, Redux toolkit.
Hardware	LAN Climping & OS installation

INTERNSHIP

Intern   June 2024 - Jan 2025
Company Name   *Edupoly Solutions Pvt Ltd*

- Completed daily tasks and assignments related to HTML and CSS.

- Built advanced logic and made interactive websites with javascript.

- Learnt Bootstrap framework for responsive web design.

- Well-Trained in ReactJS library and also completed several tasks.

PROJECT

➢ **E-Commerce Application:** Implemented a general-purpose e-commerce store where any kind of product can be bought from the comfort of home through the Internet. When we click on the specific product's "Add to cart" button in the store, the item is added to the cart. From there, we may change the product's volume and see the overall quantity of the item.

- Redux, Javascript, HTML, CSS, Bootstrap, and the ReactJS were used in the development of the front-end web application.

- Fetched data from server by using Restful APIS.

- Routing is done through react-router-dom and designed using Bootstrap.

- Conditional styling was used to toggle the buttons.

- Updated the store using dispatch function.

➢ **E-Learning Application :**Developed an eLearning platform using HTML, CSS, Node.js,pug and MongoDB. The platform features course creation, video streaming, quizzes, and certification. The front-end is built with HTML and CSS for a responsive design, while Node.js powers the backend, ensuring scalability. MongoDB is used for efficient data management. The platform also includes secure authentication, real-time notifications, and analytics, supporting both synchronous and asynchronous learning.

STRENGTH

- Self-motivated and self-confident.

- patience

INTERESTS AND HOBBIES

- Playing Cricket
- Listening Music
- Travelling

ACHIEVEMENTS

- Acting an NCC CADET and Obtain B&C Certificates

DECLARATION

I hereby declare that the above mentioned facts and figures are true to the best of my knowledge and belief.
